Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 March 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-22, 27, and 28, drawn to an inactivated EHV vaccine, classified in class 424, subclass 229.1.
- II. Claims 23-26, drawn to a method of making an inactivated EHV vaccine, classified in class 435, subclass 238.
- III. Claims 29-31, drawn to a vaccine against EHV and EIV, classified in class 424, subclass 229.1 and 206.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions comprise different ingredients to confer immunity against different pathogens. Group III required specific viruses to be present in the composition that are absent from group I. In addition, the viruses of group III are not required to be inactivated with a particular compound.

Inventions I, III and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the method of making the vaccine can be used to make different vaccine

compositions, i.e. the compositions of groups I or III, or any virus. Further, the inactivated equine vaccines can be made by methods, such as inactivating the viruses with beta-propiolactone, aldehydes, or detergents.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent search requirements, restriction for examination purposes as indicated is proper. A search for the components in the different vaccine compositions are not overlapping because each of the vaccines comprise different ingredients that are not co-extensive. In addition, a search for the method of making the inactivated vaccine is not co-extensive with the product claims because the method can be practiced with materially different ingredients and unrelated viruses.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shanon Foley whose telephone number is (703) 308-3983. The examiner can normally be reached on M-F 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Housel can be reached on (703) 308-4027. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-4242 for regular communications and (703) 308-4426 for After Final communications.
